Dear **Mr AHAMED**,

Welcome to the ICE

Thank you for applying for ICE Student Membership online. Your online application has been approved and you are now a Student Member!

Your membership number is **93807498** – we ask that you keep this number with you at all times and quote it in any future correspondence with ICE.

As part of ICE's ongoing strategy to reduce paper and increase its online service offering, you will have a digital membership. This means that you will not receive any paper from us regarding your membership – all correspondence (including membership renewal notices) will be sent electronically to the email address you have supplied. *Please keep your email address up to date to ensure we can keep you updated with the latest Institution news!*

To start making the most of your membership and access ICE's online services, you will need to log-in to MyICE <https://www.ice.org.uk/my-ice> - the private extranet for ICE members.

In MyICE you can:

- **Keep in touch:** Amend your postal details, keep your email address and phone numbers up to date, and request a membership card. You can also change your PIN to make it something more memorable

- **Keep up-to-date with ICE activities:** ICE publishes reports, including the Salary Survey, which are available for viewing. You can also view the ICE member guide
- **Keep up-to-date with industry developments:** Subscribe to new magazines and journals - this facility is available throughout the year
- **Keep informed:** View your journals online. You can also view abstracts and full editions of any ICE proceedings you subscribe to
- **Keep engaged:** Update your interests and membership profile. You can inform ICE of your areas of professional interest, inform us of your area of work/employment type and make your CPD declaration
- **Keep in touch with your region:** Opt in to become an 'honorary' member of another region. Your mailing address determines your ICE regional membership, but you can choose to receive information from any other region - especially useful if you live, study and work in different regions
- **Keep in touch with colleagues:** Register with MyICE Network - opt in to a service where you can search and contact other members who have the same interests as you
- **Pay for any subscriptions owing:** Payment can be made securely online using either a direct debit facility, or valid credit or debit card
- **Get help with your civil engineering questions:** Receive a reply within 24 hours on any civil engineering topic with AskBrunel!

As a student member you will also benefit from:

Free access to and loans from ICE's Library, one of the world's most comprehensive civil engineering libraries at <https://www.ice.org.uk/disciplines-and-resources/ice-library-and-digital-resources>

- National and regional forums regularly held for student and graduate members by ICE's Graduates and Students National Committee (GSNet) at <https://www.ice.org.uk/careers-and-professional-development/graduate-civil-engineers/graduate-and-student-network>
- A reduced rate subscription to New Civil Engineer (NCE) or New Civil Engineer International (NCEI) magazine and discount on specialist journals
- Inside Civil Engineering - Our twice-yearly student-dedicated e-newsletter with all the latest industry news, case studies and information to ensure you're kept up to date
- Advice and support from ICE Staff Liaison Officers on campuses in the UK
- Access to ICE UK regional support teams and country representatives in over 60 countries
- Networking opportunities throughout your region at [ice.org.uk/near-you](https://www.ice.org.uk/near-you)
- Free access to ICE's business centre at One Great George Street, London

For a full summary of all the membership benefits and what the Institution can offer you, please have a look through our Member Guide – available for viewing in MyICE.

The academic qualification you have selected in your application will meet the [educational base](#) requirements for future admission as a **Member of the ICE (MICE)** without registration with the Engineering Council, on completion. The course that you are currently studying will not automatically meet the academic base requirements for registration with the Engineering Council as a Chartered (CEng) or Incorporated (IEng) Engineer on completion. If you wish to progress to CEng or IEng registration in the future, you will need to apply for an [academic assessment](#) after you complete your course.

Once you have completed your academic studies, please go to <https://www.ice.org.uk/membership/types-of-ice-membership> to find out how you can progress your career and move to the next stage of becoming a professionally qualified engineer.

If you change your course of study, please inform us via phone or email so that we can update your membership record. Do not re-apply for student membership as this will create a delay in the system.

Should you have any queries regarding the status of your membership, please contact us on +44 207 665 2211 or students@ice.org.uk.

Good luck with your studies!

Yours sincerely,

ICE Education and Learning Team
